BURNER HEADS

BlueJet Pyro products are built with high quality stainless steel and virgin brass materials, ensuring that every component ranging from burner heads, barrels to handles are designed to meet and exceed durability and safety standards. BlueJet Pyro burners and kits are designed for demanding heating, melting, brazing, waterproofing, and soldering applications, making them the perfect choice for commercial operations, trade professionals and serious hobbyists.

- Stainless steel construction with brass valve offering superior strength.
- Designed to be used with manifold P/N: 208534 or P/N: 208535
- Designed to be used with neck tubes P/N: 208536 or P/N: 208537 or P/N: 208538 or P/N: 208539

BURNER HEAD 80mm

Burner Head Diameter	80mm
Flame Length	800mm
Inlet Connection	M20 x 1 Female
Gas Consumption:	6,200 g/Hr @ 150kPa
Heat Output:	85,400KJ (80,944 BTU/Hr)

ORDERING INFORMATION	P/N
BlueJet Pyro Burner Head 80mm	208529

BURNER HEAD 60mm

Burner Head Diameter	60mm
Flame Length	600mm
Inlet Connection	M20 x 1 Female
Gas Consumption:	5,000 g/Hr @ 150kPa
Heat Output:	61,600KJ (58,386 BTU/Hr)

TUBE ADAPTOR

- The Tube Adaptor is designed to be assembled in to a pipe/tube to make a custom Manifold.

Inlet Connection	Ø 5.5mm
Outlet Connection	M20 x 1 RH M

ORDERING INFORMATION	P/N
BlueJet Pyro Tube Adaptor Manifold (M20)	208546

COMET FLASHBACK ARRESTOR (REG MOUNT - FUEL)

- Provides protection against flashbacks, backfires and sustained backfires
- Non-Return Valve prevents reverse flow of gases
- Stainless Steel Flame Arrestor extinguishes any returning flame
- Gas flow will be shut-off if arrestor becomes overheated
- Dust Filter protects the gas non-return valve against contamination
- AS 4603 compliant, Provides the highest level of safety and performance. Ensures product is suitable for contracts requiring Australian Standards compliant product.

ORDERING INFORMATION	P/N
COMET Flashback Arrestor - Reg Mount - Fuel (3/8" BSP LH)	308987

LPG EXPANSION BURNERS

- The burner torch head is constructed of stainless steel for added durability, providing longevity to the equipment reducing the need for replacement or repairs
- The left-hand thread for gas type identification provides a simple and efficient way to avoid cross-connections between incompatible gases, ensuring a safer working environment
- The torch handle is constructed with solid internal brass construction with an aluminum outer handle for added durability and provides an extra layer of protection and corrosion resistance, ensuring long-lasting use and convenience
- The handle design ensures comfort and ease of use when using the Expansion Heating Torch. The torch can be operated perfectly from a -20° to 90° angle
- Laser etched with part number and manufacture date for ease of identification and traceability
- The adjustable flame control provides versatility and convenience, allowing the user to tackle different tasks with a single heating torch, no matter the application's requirements
- Approximate Heating Temperature of Propane in Air = 1,980°C
- The Expansion Burner works in a unique fashion by taking the cold LP-Gas from the cylinder (-45°C) and running it around the burner head so the gas warms up prior to mixing with the Air (that includes Oxygen) which provides for a much better mixture of Fuel Gas (LPG) and Oxygen to produce a more efficient blue heating flame
- LPG supplied in Australia in Cylinder form is mainly Propane with a high purity rate of between 95-99% propane

Applications:

- Preheating steel/metals prior to welding applications
- Heating steel/metals prior to bending and hardening processes
- Metal repairs, maintenance and unfreezing parts
- Controlling inter-pass temperature during welding operations
- Line marking on roadways
- Heating & joining waterproofing membranes

XB50 LPG EXPANSION BURNER 50mm HEAD

- LPG/Propane supplied in Australia contains approximately 50.4 MJ (Megajoules) of energy for every 1kg of gas consumed
- The XB50 will run for approximately 4.5hrs on a 45kg LPG cylinder or ~50 minutes on an 8.5kg BBQ cylinder

Burner Head Diameter	50mm
Flame Length	600mm
Heat Output	500MJ/hr (474,000 BTU/hr @200kPa LPG)
Thread	3/8" - BSP RH
Operating Angle	-20° to 90°
Dimensions L x W x H	460mm x 80mm x 70mm
Weight	0.510kg

ORDERING INFORMATION

P/N

BlueJet XB50 LPG Expansion Burner Head 50mm

308416

XB75 LPG EXPANSION BURNER 75mm HEAD

- The XB75 will run for approximately 1hr 44mins on a 45kg LPG cylinder or ~20 minutes on an 8.5kg BBQ cylinder
- For extended use CIGWELD recommend that multiple (2+) 45kg LPG cylinders be manifolded together to supply the XB75 burner head

Burner Head Diameter	75mm
Flame Length	800mm
Heat Output	1300MJ/hr (1,232,000 BTU/hr @200kPa LPG)
Thread	3/8" - BSP RH
Operating Angle	-20° to 90°
Dimensions L x W x H	460mm x 100mm x 90mm
Weight	0.905kg

FOR OVER 100 YEARS

PICK AND MIX

The best of all, our BlueJet Range makes it really easy for you to pick the best torch and fuel cell for your application. We've set up an easy-to-use Pick & Mix chart! Boasting ergonomic handling and high heat transfers, the CIGWELD BlueJet range offers a complete set of hand held fuel torches and fuel cells to suit soldering, brazing and heating applications!

STEP 1.

Select your application

● MAXGAS ○ PROPANE ● BUTANE

STEP 2.

Match application to corresponding fuel and a flame type
