DESIGNED, DEVELOPED & TESTED IN AUSTRALIA!

Meet the new CIGWELD Transmig 395HD Multi Process Heavy Duty Welding package!

Boasting a powerful 395 Amp inverter block, this 3-phase beast packs serious punch for heavy metal applications! Loaded with essential features across MIG, STICK, TIG and GOUGING processes, the Transmig 395HD has a class leading duty cycle of 395A @ 80% and 354A @ 100%.

Oh, and did we mention it's incredibly energy efficient? The 395HD complies with the European Union ECO-Power regulations, so not only do you get more output amperage for your buck, but you pay less to run this 395A machine compared to a lot of other older machines.

The Transmig 395HD has been designed to be durable and rugged to suit the most demanding of environments across heavy fabrication, mining, oil and gas, civil construction, ship building and defence, structural steel set-ups and repair and maintenance. With its easy to read user interface with massive 32mm digital display, you can easily check your settings from a distance, along with the 16 separate memory settings to recall when needed.

Paired with the CIGWELD Transfeed 4R HD Wire Feeder with 10m interconnection leads, TWECO Trade TW4 Heavy Duty MIG Gun and a robust trolley to suit, the Air Cooled package also includes a handy drawer at the base of the trolley to place your welding gear at the end of your shift.

For welders that are using the high amperage constantly, a water cooled package is available. Using a heavy MIG Gun all day can increase fatigue and discomfort, so by utilizing the 395HD water cooled package, the TW4 Flame MIG Gun power cable is substantially lighter leading to less fatigue, heat and increase consumable life.

With a class leading 5 year warranty, factory fitted with a 32A plug, simply add Shielding Gas and MIG wire, and you're ready to go. This machine has everything you need in a heavy duty industrial MIG welder.

DESCRIPTION

The Transmig 395HD can deliver awesome arc characteristics in the most popular processes of, MIG, Gas & Gasless operation, Stick, Gouging and TIG DC-Lift welding modes (with VRD for extra safety).

Additionally, this machine has the following features:

- 4x Roll Geared Wire Drive system
- 300mm Diameter Spool Capability and includes 200mm spool adapter
- MIG Gun holder and cable management bracket
- Engineered Gas Cylinder holder for up to 'G' Size cylinders
- 2-Point Lifting Lugs for safer and convenient maneuverability
- Locating Post for Transfeed 4R HD
- MIG Adjustable Wire Burnback
- MIG Crater Fill function in 2T & 4T
- 16 Memory settings
- MIG Anti de-spooling safety feature
- STICK with Voltage Reduction Device (VRD) built-in for Safe Welding
- STICK Hot Start
- STICK Arc Force
- Arc Gouging Capable - up to 6.5mm Carbons
- 32A Plug fitted from the factory

SERIOUS VERSATILITY

The Transmig 395HD delivers a maximum output of 395Amps DC in MIG and TIG Modes, which means the machine is capable of welding metals from 1.0mm up to 20mm. In STICK mode the machine is capable of welding metals from 1.6mm up to 25mm in thickness.

WARRANTY PERIOD

5-Year conditional warranty. See terms and conditions at cigweld.com.au or in the Operating Manual, included with the machine.

TECHNICAL SPECIFICATIONS

Package Dimensions:	1020mm (L) x 500mm (W) x 1370mm (H)
Package Weight - Air Cooled	120Kg
Package Weight - Water Cooled	127Kg
Cooling	Fan Cooled
Standards	AS 60974.1:2020 IEC 60974-5:2019 IEC 60974-2:2019 EN 60974-10:2021
Number of Phases	Three Phase
Nominal Supply Voltage	415 VAC $\pm 15\%$
Nominal Supply Frequency	50/60Hz
Welding Current Range (MIG mode)	50-395A
Welding Current Range (Stick mode)	20-395A
Welding Current Range (TIG DC Lift)	20-395A
Nominal DC Open Circuit Voltage MIG Weld Mode	70V
Open Circuit Voltage (VRD On) Stick Weld Mode	<35V
Open Circuit Voltage (VRD Off) Stick Weld Mode	70V
Effective Input Current (I _{1eff})	22.6 Amps
Maximum Input Current (I _{1max})	25.5 Amps
Minimum Three Phase Generator Requirement for Maximum Output	25kVA@0.8PF
MIG (GMAW) Welding Output, 40°C, 10 min	395A @ 80%, 33.8V 354A @ 100%, 31.7V
Stick (MMAW) Welding Output, 40°C, 10 min	395A @ 80%, 35.8V 354A @ 100%, 34.1V
TIG DC Lift (GTAW) Welding Output, 40°C, 10 min	395A @ 80%, 25.8V 354A @ 100%, 24.1V
Protection Class	IP21S

TRANSMIG 395HD PLANT PACKAGE AIR COOLED

- Transmig 395HD Power Source
- Transfeed 4R HD Wirefeeder
- Transmig HD Trolley
- Transmig 395HD Interconnection Leads 10m 50mm Air Cooled
- Transmig HD Drawer
- MIG Gun TW4 3.6m Heavy Duty Tweco Trade
- Work Return Lead x 10m 50mm
- BlueJet Argon 45LPM 2 Gauge
- Feed Roll 1.2/1.6mm V Groove - Fitted
- Feed Roll 0.8/0.9mm V Groove - Spare
- Feed Roll 1.2/1.6mm Knurled - Spare
- Operating Manual
