dimex ELITE

TIG TORCHES

9/20 + 17/18/26 SERIES

PREMIUM. PRECISION. Dimex.

PRECISION PERFORMANCE

Dimex TIG Torches are engineered for performance, durability, and reliability. Delivering premium quality at exceptional value, they provide the consistency and control you need to focus on precision and stacking dimes!

ENHANCED CONTROL

Dimex and Dimex Elite Torches feature our newly engineered custom handles, designed to deliver superior control, comfort, and performance. Built with advanced ergonomics, the Dimex Elite range ensures maximum comfort for extended, all-day welding applications.

The Dimex range incorporates the classic pencil grip handle, now enhanced with our innovative sheath adaptor. This smart design provides a clean, professional solution for fitting larger diameter sheaths to smaller 9 and 17 series handles.

Available in 4m and 8m lengths, with 25mm and 50mm DINSE* connectors, Dimex and Dimex Elite Torches are built to suit a wide range of welding applications with reliability and precision.

ADVANCED COOLING

Lightweight and durable, Dimex torch heads feature high temperature silicone insulation and premium copper internals for cooler operation, increased longevity, and maximum current capacity in demanding applications.

INTEGRATED POWER ADAPTER

Dimex TIG Torches are equipped with an integrated power adaptor that cleanly separates the gas line, water lines, and power connection. This streamlined design securely protects the torch internals, delivering enhanced durability and reliable performance in demanding welding environments.

dimex TIG TORCH

AVAILABLE IN
**AIRCOOLED
VARIANTS:
9V 17V 26V**

FEATURES

Standard Consumables
Dimex Torches utilize standard industry consumables for great user convenience.

Classic Pencil Grip Handle
Allowing full control and comfort for all day welding.

Custom Sheath Adapter
Allows smooth rotation of the torch and a neat solution to adapting large diameter sheaths to smaller 9 & 17 series torch handles.

Cooling Technology
Designed using copper internals and high temp resistant materials to reduce running temperatures.

Laser Etched CIGWELD Valve
For a premium touch.

CIGWELD Embossed Handle
So you know you're getting the real deal.

Locking Nut
For full serviceability and a secure sheath connection.

Synthetic Cable Sheath
For enhanced cable protection.

dimex ELITE TIG TORCH

AVAILABLE IN
**AIRCOOLED &
WATERCOOLED
VARIANTS:
9, 9F 17, 17F 18, 18F 20,
26, 26F, 26FV**

DIMEX ELITE TORCH FEATURES

Cooling Technology
Designed using copper internals and high temperature resistant materials to reduce running temperatures.

Trigger and Potentiometer
Advanced control of welding parameters, all from the convenience of your torch.

Custom CIGWELD Handle
To match the ergonomics with style.

Leather Cable Sheath
For enhanced cable protection, and flexibility.

Standard Consumables
Dimex Elite Torches utilize standard industry consumables for great user convenience.

Ergonomic Handle
Advanced comfort and stability to promote precision while welding.

Flexible Ball Joint
Relieves joint strain for maximum cable flexibility and handle longevity.

DIMEX TIG TORCH - SPECIFICATIONS:
